" " " " Sea Level 55 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

AIR MINISTRY.

FORM, 1090. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Burgh Hall
in the County of Burgh Castle Suffolk
by Hy. P. Frederick

Lat. 52.34⅔ N. Long. 1.41½ E
Time of Observation 9 am.
Nearest Railway Station Gorleston (North)
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground — ft. 10 in.
" " " " Sea Level 44 · 40 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 192~~4~~3

Kept at 16 Northgate Bury St Edmunds

in the County of Suffolk

by Revd I. S. Pratt

Lat. .... Long. ....

Time of Observation 9 am

Nearest Railway Station Bury St Edmunds

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground one ft. .... in.

" " " " Sea Level 100 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

Date	Jan.	Feb.	March	April	May	June	July	August	Sept.	Oct.	Nov.	Dec.	*Date*

MEMORANDUM.

FROM
REV. CANON E. HILL,
THE RECTORY,
COCKFIELD,
BURY ST. EDMUNDS.

Railway Station:—
COCKFIELD, G.E.R.,
Distant ⅔ Mile.
—o—
Money Order and Telegraph Office:—
COCKFIELD, SUFFOLK.
Distant ½ Mile.

cannot be accounted for
error J.

To 4 Jan. 1923

1922 Jan. 15. 0·36.

The Snow had drifted irregularly near the Guage.

Attempts to average its depth over Lawn and field failed, from the drifting. It appeared however to be 4 in. or more: This agrees with the melted actual content of the Guage, which is accordingly entered in the Return

E. Hill

Ex. 3.D 1922 BOX 4-5 1293

FORM 2. METEOROL RGANIZATION.

REGISTER OF RAINFALL IN 1921.

Kept at Ipswich (Copdock)

in the County of Suffolk

by F. L. Bland.

Lat. 52° 1′ Long. 1° 5′ E
Time of Observation 9h G.M.T.
Nearest Railway Station —
Diameter of Funnel of Rain Gauge — in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 164 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Inches should not be entered on this form.

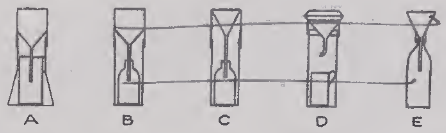
Indicate pattern of gauge in use by deleting those sketches of cross sections of gauges which do not represent it. If the pattern is different from any of these please make a sketch of it. (Good gauges to use are those marked A and B.)



If you know of any record of rainfall not quoted in ***British Rainfall,*** please give the observer's name and address :—

....

NOTES ON EXCEPTIONAL RAINFALL OF THE YEAR.

In giving particulars of falls of unusual intensity it is desirable that answers to the following questions be supplied :—

(a) Is it known that the gauge was empty at the beginning of the measured rainfall?
(b) What note was made of the times of beginning and end of this fall?
(c) When was the measurement made?

M.O. 7
9 JAN 1926

D INSTRUCTIONS.

1. Advice as to the selection of the site for a raingauge, particulars of the gauge recommended for use and other information is given in "Rules for Rainfall Observers," to be obtained from The Director, Meteorological Office, Air Ministry, London, W.C. 2, or from The Superintendent, Meteorological Office, 6, Drumsheugh Gardens, Edinburgh.

2. In filling up the register on the reverse side the following rules should be observed. Those rules which apply also to the summary form above are printed in *italic type*:—

(a) *Rain should be measured each morning, preferably at 9 a.m., Greenwich Mean Time. The measurement is to be credited to the previous day and should be entered in the register at the time of observation. Thus the entry for January 1st is the rainfall for the 24 hours following 9 a.m. on January 1st; it is therefore the amount measured on January 2nd.*

(b) *The raingauge should be visited every morning without exception.* When there has been no precipitation the entry in the register should be a dash — (not 0·0). The entry "trace" or "tr" is to be made in the two following cases, (A) and (B).

(A) When there is less than ·05 mm. of water in the gauge and the observer knows that this is not the result of a drop or two draining from the sides of the can after emptying the rainwater out of it at a previous time of observation, i.e., the observer must be reasonably certain that there has actually been precipitation since the preceding measurement. If the observer knows that the precipitation has been in the form of dew or wet fog this may be noted.

(B) The observer knows definitely from his own observation that some rain (or other form of precipitation such as snow, hail, sleet or drizzle) has fallen since the preceding observation, and yet finds no water in the gauge. This happens sometimes especially in dry, warm weather, without the gauge being even damp, the small amount of rain having evaporated before it got into the receiving can.

(c) *On some measures there is graduation marked ·05; this graduation is to show the limit between the amounts which count as 0·1 and those which are mere "traces."* An entry ·05 is not to be made in the register.

(d) If the morning observation has to be omitted for one day or more, the days covered by the next reading should be indicated by a bracket. Thus $\left.\begin{matrix}17\\18\end{matrix}\right\}3{\cdot}6$ would show that the reading on the morning of the 18th day of the month was missed and that the reading on the morning of the 19th was 3·6 mm.

(e) *The total rainfall for the month is found by addition. The addition should always be done a second time as a check.* The check is of special importance when the total has already been found in another copy of the register.

(f) *The "total number of days with 0·2 mm. or more" includes all the days with any rain except those for which the entry is "trace" or 0·1 mm.*

(g) If observations are not available for every day during the month the spaces for the number of days with rain should be left blank.

(h) The heaviest daily fall for each month should be underlined.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at The Limes Great Cornard 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your 1925 rainfall return with those of neighbouring stations suggests that an omission has occurred on October 26 and the reading of August 22nd appears high as shown below.

	Sudbury Friar St	Gt Cornard	Bulmer
August 22	·56	1·17	·44
October 26	·14	-	·18

We should be glad if you would refer to your original record and confirm or correct the readings in question. Unless there is any reason to the contrary we would suggest the interpolation of ·15 inch on Oct. 26th.

JGlasspoole
2.VI.26.

Aug. 22nd. REPLY.

I have no reason to doubt the correctness of my figures for Aug. 22nd. as I see from my diary we had heavy thunder storm with much rain a.m. & again towards evening, these are often purely local.

For October 26. my diary says there was rain but my original record does not show it, so at this distant date presume it was not measurable

adopt 1·17 in aug 22
& ·15 in oct 26

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted..........................
2. Necessary corrections made in Monthly Return..........................
3. " " " " Weekly (Form 3110)..........................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division..........................

Lat. Long.
Time of Observation 9. am
Nearest Railway Station Thurston
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 3 ft. - in.
" " " " Sea Level 270 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2; or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

(formerly B.R.O. Form A.1).

REGISTER OF RAINFALL IN 1924.

Kept at East Bergholt

in the County of Suffolk

by Alfred Harwood

ALFRED HARWOOD
ROCKWORTH HOUSE
EAST BERGHOLT
Suffolk

Lat 51.57 Long 1.10 E.

Time of Observation 9 a.m

Nearest Railway Station Manningtree

Diameter of Funnel of Rain Gauge 8 in.

Height of top of Gauge above Ground 1 ft. 6 in.

" " " Sea Level 145 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at East Bergholt 192

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your 1925 rainfall return with those of neighbouring stations suggests that omissions have occurred on April 14th and 26th as shown below.	Your figures and my Register do not agree — I have:

	Dedham	East Bergholt	Mistley	Capel St Mary
April 14	·22	- ·07	·19	·20
" 15	·06	·07 ·03	·09	·10
" 16	·05	·03 —	·08	·03
" 26	·15	- —	·12	·09

April 14th .07
" 15 .03
" 16 —
" 26 —

If you have no reason to the contrary we would recommend that values of ·20 and ·15 inch be adopted for the two days in question, making the total for April 1·59 and the year 20·12 ins

J Glasspoole
2.VI.26

You may "fake" my record if you wish, but I believe it to be accurate — Many small showers are very local — My gauge is on the top of a hill — Dedham and Mistley are in the valley and sometimes have rain when we don't — This seems to be an exceptionally dry spot — If the rainfall for April 15th and 16th in my return are as you state I must have made a mistake in copying it —

Alfred Harwood

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted........................
2. Necessary corrections made in Monthly Return..........................
3. " " Weekly (Form 3110)..................

adopt observers original figures and note that observer confirms them.

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

FORM 1090 METEOROLOG ATION. 1280 A

REGISTER OF RAINFALL IN 1924.

Kept at Fornham St. Martin Rectory. Bury St. Edmunds

in the County of Suffolk

by (Rev) Harold Buckton.

Lat. 52° 15' N Long. 40' E

Time of Observation 9·30 a.m. (post breakfast)

Nearest Railway Station 'Bury St. Edmunds'.

Diameter of Funnel of Rain Gauge 6 3/4 in.

Height of top of Gauge above Ground 4 ft. in.

" " " " Sea Level 130 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

M.O. 7
3 JAN 1927

AIR MINISTRY.

FORM 1091. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1926.

Kept at Felixstowe
in the County of Suffolk
by P.O. of W/T Station

Lat. 51·57N Long. 1·20E
Time of Observation 9 GMT
Nearest Railway Station Felixstowe Beach
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 6 in.
" " " " Sea Level 15 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Inches should be entered on Form 1090.

FORM A. 1. METEOROLO ZATION

REGISTER OF RAINFALL IN 1921.

Kept at The Beeches, Halesworth
in the County of Suffolk
by G. Wilfred Stanford

Lat. —— Long. ——
Time of Observation 9 a. m.
Nearest Railway Station Halesworth
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 2 ft. 3½ in.
" " " " Sea Level —— ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

REGISTER OF RAINFALL IN 1922.

Kept at 5 HALESWORTH.
in the County of SUFFOLK.
by G. WILFRED. STANFORD.

Lat. 52°20½′ Long. 1° 30½′
Time of Observation about 9 a. m.
Nearest Railway Station HALESWORTH
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 2 ft. 3½ in.
" " " " Sea Level about 120 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should be entered on Form 1091.

FORM 1090 METEOROLO ANIZATION.

(formerly B.R.O. Form A.1).

10 JAN 1922

REGISTER OF RAINFALL IN 1921.

Kept at Hengrave Hall,
in the County of Suffolk,
by Sir John Wood Bart. M.P.

Lat. 52°17 Long 40' (approximately)
Time of Observation 9 a.m.
Nearest Railway Station Bury St Edmunds.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 5 in.
" " " " Sea Level 84-6" ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

AIR MINISTRY.

Form 1090 5

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Hengrave Hall,
in the County of Suffolk
by Sir John Wood Bart.

Lat. 52° 17′ Long. 40′
Time of Observation 9 a.m.
Nearest Railway Station Bury St. Edmunds.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 5 in.
" " " " Sea Level 84′ 6″ ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to The Superintendent, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to The Superintendent, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Loose Hall Hitcham 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your 1925 rainfall return with those of neighbouring stations suggests that omissions have occurred on August 22 & 26 and November 25 & 29th-30th as shown below

	Cockfield	Loose Hall
Aug 22	·21	-
26	·11	-
Novr 25	·22	-
" 29-30	·38	·25

If you have no reason to the contrary we would recommend that values of ·20, ·10, ·20, and ·40 inch be adopted making the total for August 2·67, & November 2·06 and the year 23·02 inches We should be glad of your comments on these differences

J Glasspoole

1. vi. 26.

REPLY.

I do not think that my figures should be altered. The records of Hitcham Rectory would perhaps furnish a better comparison.

Please note that beginning from June 14 my record will be taken at Battisford Hall Needham Mkt, Suffolk. & not at Hitcham as I have changed my address.
I will furnish particulars on form when I send it in.

noted in A.C. lists A.S.G.

Query entries
but print total for year.

AIR MINISTRY.

FORM 1090 METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1923.

Kept at Hobland Hall · Bradwell

in the County of Suffolk

by Col. A. G. Lucas

Lat. .... Long. ....

Time of Observation 9 a.m.

Nearest Railway Station Gorleston-on-Sea

Diameter of Funnel of Rain Gauge 8 × 8 in.

Height of top of Gauge above Ground 2 ft. 3 in.

" " " " Sea Level 40 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following. ·17

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Holbrook Hall
in the County of Suffolk
by Lt Col A St Leger Glyn

Lat. 52° 2′ Long. 42′ East.
Time of Observation 9 AM.
Nearest Railway Station Lavenham GER.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 4 ft. 6 in.
" " " " Sea Level 185 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

omitted.

Dear Sir.

I enclose my rainfall register – I am so sorry that this year I have not been able to fill in the totals as I do not know what rainfall there was on the night of Nov. 26–27 – as the gauge was carried

Totals given checked

I so much regret that owing to an accident to the Gauge on 2 occasions I was unable to show readings — at least I could not be sure of them so did not put them in. A. Glyn.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at

Holbrook Hall Sudbury 1925

the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
The entry on your 1925 rainfall return for July 23rd ·02 inch appears low compared with neighbouring stations. At Sudbury ·64 was recorded. If you have no reason to the contrary we would recommend that ·62 inch be adopted. For April 22 and May 22-23 (the days when an accident happened to your gauge) we are adopting ·10 and 1·20 inch respectively The totals for the months that require amendment will be April 2·09 May 2·56 July 2·02 and the year 23·43 inches We should be glad to hear that you concur in these amendments. J Glasspoole 2 . VI . 26 .	I agree with these suggestions - but would like to point out that very often we do not get a drop of rain up on the hill here where as Sudbury in the valley has a heavy fall. It is hardly 4 miles away and yet we often find a heavy storm has taken place there when we are parched for want of rain. This is only a remark & I agree with your suggestions really. Yrs. truly Amy St Leger Glyn.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted..........
2. Necessary corrections made in Monthly Return..........
3. " " " " Weekly (Form 3110)..........

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division..........

(192) Wt. 4402A—10416 2,000 6/24 T.S. 128

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following. ·06

Records taken in Millimetres should be entered on Form 1091.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Lower Abbey Leiston 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
The entry on your 1925 rainfall return for August 11th (·21 inch) appears low compared with neighbouring stations. At Snape ·71 inch was recorded. We should be glad if you could confirm or correct this entry from any notes you may have made.	The entry ·21 inch for August 11th is quite correct, I have no notes but 21 inches is what I have down on my entry.
Also the total for November is not in agreement with the sum of the daily values. The correct total appears to be 2·77 inches. J Glasspoole 2.VI.26.	I find that the total for November is 2·77 inches as you say, this makes the total for the year 1925 - 21·15 inches. it is a mistake in the adding up. M. K. Rope.
	Accept observers value ·21 in. on August 11th.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted........................
2. Necessary corrections made in Monthly Return,..........................
3. „ „ „ „ Weekly (Form 3110)..........................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....

FORM 1090

AIR MINISTRY.

METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1924.

13 JAN 1925

Kept at Lound Rectory
in the County of Suffolk
by Violet E. Howes Mrs

Lat. ______ Long. ______
Time of Observation 9 a.m.
Nearest Railway Station Hopton
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. – in.
" " " " Sea Level 63 ft.

Rain should be measured daily at 9 a.m. (Greenwich Time) and the result entered to the previous day. An Observer who prefers not to conform to this almost universal rule, should insert the reading at 9 a.m. on January 1st of the following year in the space on the right of this paragraph.

Jan. 1, following.

Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, Meteorological Office, Air Ministry, Kingsway, London, W.C. 2, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Records taken in Millimetres should be entered on Form 1091.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1, or to THE SUPERINTENDENT, Meteorological Office, 10, Rothesay Place, Edinburgh.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

Please let us have the values for the missing months if available. ~~please~~ (1)
In the case of Belvedere do you know if the original ~~figures~~ readings are in mms or inches? (2)
In the case of Lowestoft will you write for the missing months specially or have you done so? (3)

John Glasspoole

METEOROLOGICAL
OFFICE
31 MAY 1922

QUERY FORM.

On examination of the return of observations made at Lowestoft Jan & Feb 1921 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

Will you kindly say whether any Rainfall observations were taken at Lowestoft during January and February 1921

If so, will you please enter the amounts on this form

FORM A. 2. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

REGISTER OF RAINFALL IN 1922.

Kept at Lowestoft

in the County of Suffolk

by C. W. Edwards, for the Corporation

Lat. 52°29 Long. 1°45' W

Time of Observation 9h & 17h.

Nearest Railway Station

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 0 in.

" " " " Sea Level 84 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Inches should not be entered on this form.

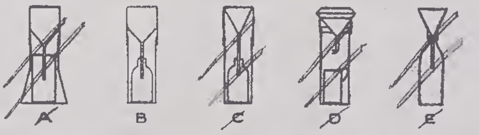
Indicate pattern of gauge in use by deleting those sketches of cross sections of gauges which do not represent it. If the pattern is different from any of these please make a sketch of it. (Good gauges to use are those marked A and B.)



If you know of any record of rainfall not quoted in ***British Rainfall***, please give the observer's name and address:—

....

NOTES ON EXCEPTIONAL RAINFALL OF THE YEAR.

In giving particulars of falls of unusual intensity it is desirable that answers to the following questions be supplied:—

(a) Is it known that the gauge was empty at the beginning of the measured rainfall?
(b) What note was made of the times of beginning and end of this fall?
(c) When was the measurement made?

25·0 mm. on 27th Nov.

(a) Yes, the gauge was emptied at the 9 o'clock observation on the 27th.

(b) Fall commenced at 8hrs on 27th + snow fell, very lightly, at intervals during day. Heavier snow fall during night of 27th; + a very heavy fall occurred about 1.30 hrs. of 28th accompanied by thunder + lightning.

(c) 1.5 mm. at 17 hrs. on 24th. + 23.5 mm. at 9hrs on 28th

D INSTRUCTIONS.

M.O. 7
12 JAN 1926

1. Advice as to the selection of the site for a raingauge, particulars of the gauge recommended for use and other information is given in "Rules for Rainfall Observers," to be obtained from The Director, Meteorological Office, Air Ministry, London, W.C. 2, or from The Superintendent, Meteorological Office, 6, Drumsheugh Gardens, Edinburgh.

2. In filling up the register on the reverse side the following rules should be observed. Those rules which apply also to the summary form above are printed in *italic type*:—

(a) *Rain should be measured each morning, preferably at 9 a.m., Greenwich Mean Time. The measurement is to be credited to the previous day and should be entered in the register at the time of observation. Thus the entry for January 1st is the rainfall for the 24 hours following 9 a.m. on January 1st; it is therefore the amount measured on January 2nd.*

(b) *The raingauge should be visited every morning without exception.* When there has been no precipitation the entry in the register should be a dash — (not 0·0). The entry "trace" or "tr" is to be made in the two following cases, (A) and (B).

(A) When there is less than ·05 mm. of water in the gauge and the observer knows that this is not the result of a drop or two draining from the sides of the can after emptying the rainwater out of it at a previous time of observation, i.e., the observer must be reasonably certain that there has actually been precipitation since the preceding measurement. If the observer knows that the precipitation has been in the form of dew or wet fog this may be noted.

(B) The observer knows definitely from his own observation that some rain (or other form of precipitation such as snow, hail, sleet or drizzle) has fallen since the preceding observation, and yet finds no water in the gauge. This happens sometimes especially in dry, warm weather, without the gauge being even damp, the small amount of rain having evaporated before it got into the receiving can.

(c) *On some measures there is graduation marked ·05; this graduation is to show the limit between the amounts which count as 0·1 and those which are mere "traces."* An entry ·05 is not to be made in the register.

(d) If the morning observation has to be omitted for one day or more, the days covered by the next reading should be indicated by a bracket. Thus $\left.\begin{matrix}17\\18\end{matrix}\right\}3{\cdot}6$ would show that the reading on the morning of the 18th day of the month was missed and that the reading on the morning of the 19th was 3·6 mm.

(e) *The total rainfall for the month is found by addition. The addition should always be done a second time as a check.* The check is of special importance when the total has already been found in another copy of the register.

(f) *The "total number of days with 0·2 mm. or more" includes all the days with any rain except those for which the entry is "trace" or 0·1 mm.*

(g) If observations are not available for every day during the month the spaces for the number of days with rain should be left blank.

(h) The heaviest daily fall for each month should be underlined.

FORM A. 1. **METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.**

8 - JAN 25

.1264

REGISTER OF RAINFALL IN 1924.

Kept at Bridge Villa Mill Road, Lowestoft

in the County of Suffolk

by Mark Bean

Lat. 52° 24′ 30″ N Long. 1° 44′ 0″ E.
Time of Observation 9 am
Nearest Railway Station Lowestoft (Central)
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. 1 in.
" " " " Sea Level 18 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

Records taken in Millimetres should not be entered on this form.

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Mill Road Lowestoft 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your return with those of neighbouring stations suggests that an omission has occurred on November 30th as shown below Lowestoft (Belle Vue Park) ·32 -do- Mill Road — Bungay ·30 If you have no reason to the contrary we would recommend that ·30 inch be adopted ~~making~~ the total for November 3·86 inches and for the year 26·69 inches We should be glad of your comments on this point. J Glasspoole 2 . vi . 26	I note your remarks on annexed which I do not attempt to dispute, but adopt, and have corrected my return in accordance therewith viz Nov. total 3.86 and annual total 26.69. The fact is I was in Hospital at the time and doubtless my daughter omitted to enter the rain in question in my return. Mark N Bean Bridge Villa, Mill Road Lowestoft. 3 June 1926.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted........................
2. Necessary corrections made in Monthly Return..............................
3. ,, ,, ,, ,, Weekly (Form 3110)..............................

For use in M.O. 2.

4. Necessary corrections noted in Forecast Division ....
